What We Do

- **Opt-in Permission Based eMail Marketing**

We specialize in permission-based, social and mobile-enabled email marketing campaigns of all sizes and levels of complexity. With millions of 100% true opt-in records and an endless list of categories, reaching your best prospects is just a click or a call away!

By utilizing **Mailtricity's** live tracking system, you can monitor, measure and analyze mailing status, open and click progress and drill-down to engagement by offering or individual hyperlink. Email is the digital glue of social media.

- **Email Appending**

If you own a list, or have a database of names without the email addresses, we offer an append service that will match up email addresses with names and home or business addresses in your list. Our append service is a great way to start the conversation with your customers and prospects to keep them engaged, bolster brand awareness and encourage repeat business with minimal out-of-pocket cost.

- **Database Broadcasting**

If your company already has an in-house database of prospects or customers, we can send them an email of your company specials, sales, new products or simply send out your monthly newsletter. This program is a great way to build customer loyalty and retention.

- **Social Media Marketing**

Social Media Marketing or SMM provided by **Mailtricity** is the process of generating brand interest and fostering positive brand sentiment through blogs, RSS feeds, virtual 3D networks and social networks.

The user-generated content of SMM can be an extremely effective channel for building product reputation, management and corporate branding. **Mailtricity** can also optimize each social media site or campaign in order to generate the greatest amount of awareness and traffic. This process is also called Social Media Optimization or SMO.
